The Government of Guyana Advances Engagement on Carbon Credits

Seeks Proposals for Transactions of ART TREES Certified Credits

On October 26, 2021 the Architecture for REDD+ Transactions (ART) Secretariat, approved TREES Documents Submitted by Guyana. Verification and Validation processes are currently being conducted. TREES is the standard under which Guyana's carbon credits are being registered and certified for transaction in a carbon market.

Since October 2021, these documents have been posted publicly on the [ART Registry](#) and include a TREES Registration Document and TREES Monitoring Report for the 2016-2020 Crediting Period and a TREES Registration Document for the 2021-2025 Crediting Period.

As this process advances, Guyana is welcoming proposals for transactions of ART TREES Certified Credits up until 14th March 2022.

Interested parties can submit proposals to:
